

## Web アプリケーションの仮想パスを絶対パスの取得

以下、JSP の場合。

Servlet の場合は、 を使用する

```
<%  
out.println(application.getRealPath("sample.txt"));  
// C:\Program Files\Apache Software Foundation\Tomcat 5.0\webapps\jvatis\sample.txt  
  
out.println(application.getRealPath("/sample.txt"));  
// C:\Program Files\Apache Software Foundation\Tomcat 5.0\webapps\jvatis\sample.txt  
  
out.println(application.getRealPath("./sample.txt"));  
// C:\Program Files\Apache Software Foundation\Tomcat 5.0\webapps\jvatis\.\sample.txt  
  
out.println(application.getRealPath("/sample/sample.txt"));  
// C:\Program Files\Apache Software Foundation\Tomcat 5.0\webapps\jvatis\sample\sample.txt  
  
out.println(application.getRealPath("sample/sample.txt"));  
// C:\Program Files\Apache Software Foundation\Tomcat 5.0\webapps\jvatis\sample\sample.txt  
%>
```
