

簡易的にフォームをコピーする

```
$("#[name^=data\\[\\]").each(function(){  
    var reg = new RegExp("data\\[\\..*?\\]\\]");  
    var newName = this.name.match(reg)[1];  
    var element = document.createElement("input");  
    element.type = "hidden";  
    element.name = "data[" + name + "]" + newName + ";";  
    element.value = this.value;  
    targetForm.appendChild(element);  
});
```
