

<http://pear.php.net/manual/ja/package.html.pager.php>

使い方

サンプル 1

```
<?php
// $data に対象データをセットしておく

$options = array (
    "perPage"      => 20,
    "itemData"     => $data,
    "mode"         => "Sliding",
    "prevImg"      => "&laquo;",
    "nextImg"      => "&raquo;",
    "firstPagePre" => "",
    "firstPageText" => "&lsaquo;",
    "firstPagePost" => "",
    "lastPagePre"  => "",
    "lastPageText" => "&rsaquo;",
    "lastPagePost" => "",
    "clearIfVoid"  => true,
    "httpMethod"   => 'POST',
);

$pager =& Pager::factory($options);

// 各ページへのリンク
$navi = $pager->getLinks();
$this->set('pages', $navi['all']);
```

サンプル 2

onClick で処理したい場合。

<https://knocking.g.hatena.ne.jp/kururi0421/20070604>

```
"path" => '',
"append" => false,
"fileName" => 'javascript:void(%d);',
"onclick" => 'function(%d);'
```
